

Paper Rail

Papergrip is one rail that has two uses. Thanks to a strip, paper and small posters can be easily locked into the rail and can be removed again with a single motion. Secondly, cards and similar objects can be placed in the special edge on top of the rail.

Application:

Papergrip is suitable for both thick and thin paper and can even hold light magazines up to 3.5 mm and laminated paper. The rail practically has a one-piece design and can be mounted in different ways. Multiple rails can be connected to create a hanging system that spans an entire wall.

Features:

Dimensions: 45mm high x 13mm deep

Lengths: 100cm \$40 - 200cm \$75

Colour: Standard in white, textured black or textured aluminium. Other colours on request.

Mounting: Rail clips (3 per metre), magnetic tape or double-sided.
